Reykjanes field trip

status planning · dates Nov 14 → 17 · #iceland · #geology

Four days on the peninsula, following the 2021–2024 eruption sites. Main goal: sample the fresh [[Pāhoehoe vs ʻaʻā|pāhoehoe]] crust at Fagradalsfjall and compare it with the older flows we logged in Lanzarote 2025.

> **Safety**
> Check the Met Office gas forecast every morning. Sites close without notice.

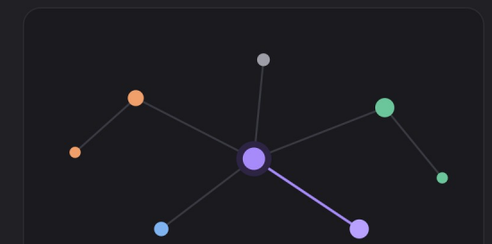

Gear

- [x] ~~Rock hammer and hand lens~~
- [ ] Sample bags, labelled by site
- [ ] Gas monitor — borrow from [[Sigrún]]

Day 1 — Sundhnúkur

Fissure row east of Grindavík. Look for columnar jointing in the cooled margins.
